## **Mental Health Recovery Insights:**

*Recovery in Mental Health* Michaela Amering, Margit Schmolke, 2009-06-22 Winner of Medical Journalists Association Specialist Readership Award 2010 Recovery is widely endorsed as a guiding principle of mental health policy Recovery brings new rules for services e.g. user involvement and person centred care as well as new tools for clinical collaborations e.g. shared decision making and psychiatric advance directives. These developments are complemented by new proposals regarding more ethically consistent anti discrimination and involuntary treatment legislation as well as participatory approaches to evidence based medicine and policy. Recovery is more than a bottom up movement turned into top down mental health policy in English speaking countries. Recovery integrates concepts that have evolved internationally over a long time. It brings together major stakeholders and different professional groups in mental health who share the aspiration to overcome current conceptual reductionism and prognostic negativism in psychiatry. Recovery is the consequence of the achievements of the user movement. Most conceptual considerations and decisions have evolved from collaborations between people with and without a lived experience of mental health problems and the psychiatric service system. Many of the most influential publications have been written by users and ex users of services and work groups that have brought together individuals with and without personal experiences as psychiatric patients. In a fresh and comprehensive look this book covers definitions, concepts and developments as well as consequences for scientific and clinical responsibilities. Information on relevant history, state of the art and transformational efforts in mental health care is complemented by exemplary stories of people who created through their lives and work an evidence base and direction for Recovery. This book was originally published in German. The translation has been fully revised, references have been amended to include the English language literature and new material has been added to reflect recent developments. It features a Foreword by Helen Glover who relates how there is more to recovery than the absence or presence of symptoms and how health care professionals should embrace the growing evidence that people can reclaim their lives and often thrive beyond the experience of a mental illness. Comments on German edition: It is fully packed with useful information for practitioners, is written in jargon free language and has a good reading pace. Theodor Itten, St. Gallen, Switzerland and Hamburg, Germany. This book is amazingly positive. It not only talks about hope, it creates hope. Its therapeutic effects reach professional mental health workers, service users and carers alike. Fleet footed and easily understandable at times, it reads like a suspense novel. Andreas Knuf, pro mente sana, Switzerland. This is the future of psychiatry, cheered a usually service oriented manager after reading the book. We might not live to see it. Ilse Eichenbrenner, Soziale Psychiatrie, Germany.

**Creative Mental Health Recovery** Robert Hurst, Andrew Voyce, Jerome Carson, 2024-11-12 This book presents the importance of the role of creativity, particularly everyday creativity, in the lives of people on a mental health recovery journey. Through a review of historical and contemporary literature and research findings on the topic, the book starts by giving readers an idea of the state of play of conceptualisations of both

creativity and recovery The authors arrive at and present their own definitions of these concepts using autoethnography to bring their own experiences into the text They then illustrate to the reader what creativity in recovery looks like in practice through interviews with and written accounts from creative individuals who have experienced a mental health recovery journey grounding the theory with tangible stories of application The interviews are analysed with themes picked out and a model of creativity and recovery produced by the authors Implications and possible future directions are then discussed This unique presentation of creative recovery will be of interest to a wide range of mental health professionals specifically those studying or practising mental health recovery and creative therapies     Insights in social psychiatry and psychiatric rehabilitation: 2022 Andrew Molodynski,Thomas Jamieson Craig,Antonio Vita,2024-04-08     **Recovery in Mental Health**

from the year 2007 in the subject Psychology Clinical Psychology Psychopathology Prevention grade hervorragend 1 3

University of Applied Sciences Coburg Universities of Applied Science in Coburg and Alice Salomon in Berlin Germany

course Klinische Sozialarbeit language English abstract Abstract Objectives The purpose of this study was to explore the

relationship between illness insight in schizophrenia and the level of social adaptation social support needs and subjective

life satisfaction for consumers of community mental health support services Methods Samples N 43 were recruited from

community base independent service agencies providing case management services for mentally ill people in the western

Berlin Germany catchment area Separate interviews were conducted with the case managers and their clients diagnosed

with schizophrenia ICD 10 Quantitative measurements were used to establish if there is a relationship between illness insight

and the various psychosocial variables assessed in this study Results Low illness insight correlated with low levels of social adaptation Low social adaptation correlated inversely with the case managers assessment of more social support needs for their client The clients low subjective life satisfaction correlated with higher client rated social support needs The client and case manager rated social support needs correlated strongly Conclusions Low illness insight may be an indicator of low social adaptation that might require increased case manager engagement to meet more client social support needs For this further research is essential 1 Introduction I am not mentally ill and I don t need any help is one variation of what many mental health professionals will hear from their clients with schizophrenia Amador Johanson 2000 The professionals hearing this may often be those employed by community mental health support services to help these individuals claiming not to need any help The fact that these clients are usually residents of supervised living programs makes their claim even more perplexing When their case manager or key worker asks them why they are living here the worker usually receives an answer ranging from the delusional I ve been placed here by aliens to the more mundane where else should I live I ve no other place to go ibid *New Research in Mental Health* ,2004
