The Geometry Of Biological Time:

The Geometry of Biological Time Arthur T. Winfree, 2001-06-08 Dealing with dynamics of processes that repeat themselves regularly this revised and updated edition extends the thread from 1980 to the present day concentrating on areas of interest where there will be much activity in the future This involves going through spatial biochemical electrophysiological and organismic dynamical systems and patterns that were discovered by pursuing the theme of phase singularities introduced in the original book In particular the work on excitability in cell membranes will be thoroughly updated as will the references throughout the book **The Geometry Of Biological Time** A.T. Winfree, *Organisation and Regulation* G. A. Chauvet, 1996-06-14 *Organisation and Regulation* **Theoretical Systems in Biology** Gilbert Chauvet, 1996 *The Mathematical Nature of the Living World* Gilbert Chauvet, 2005 The topic of the book a theory of functional biology that incorporates the fundamental principles underlying the functioning of living organisms is clearly appropriate as we celebrate the 50th anniversary of the discovery by Watson and Crick of the structure of the DNA molecule

The Mathematical Intelligencer ,1985 *Lectures in the Sciences of Complexity* ,1992 **Scientific American** ,1988 Monthly magazine devoted to topics of general scientific interest **Light and Biological Rhythms in Man** L. Wetterberg, 1993 In this volume current knowledge on light as a regulator of biological rhythms is considered from both basic science and clinical perspectives Chapters by leading experts cover the whole range of biological rhythms from infradian and circadian to the longer ultradian rhythms in a wide variety of mammalian species The chapters on humans provide a basis on which to establish mechanisms for mediating the therapeutic and physiologically beneficial effects of light as a regulator of rhythms in health and disease *Mathematical Models of the Circadian Sleep-wake Cycle* Martin C. Moore-Ede, Charles A. Czeisler, 1984 **Journal of Mathematical Biology** ,1982 *Mathematics in Medicine and the Life Sciences* Frank Charles Hoppensteadt, Charles S. Peskin, 1992 The aim of this book is to introduce the subject of mathematical modeling in the life sciences It is intended for students of mathematics the physical sciences and engineering who are curious about biology Additionally it will be useful to students of the life sciences and medicine who are unsatisfied with mere description and who seek an understanding of biological mechanism and dynamics through the use of mathematics The book will be particularly useful to premedical students because it will introduce them not only to a collection of mathematical methods but also to an assortment of phenomena involving genetics epidemics and the physiology of the heart lung and kidney Because of its introductory character mathematical prerequisites are kept to a minimum they involve only what is usually covered in the first semester of a calculus sequence The authors have drawn on their extensive experience as modelers to select examples which are simple enough to be understood at this elementary level and yet realistic enough to capture the essence of significant biological phenomena drawn from the areas of population dynamics and physiology Because the models presented are realistic the book can serve not only as an introduction to mathematical methods but also as a mathematical introduction

to the biological material itself For the student who enjoys mathematics such an introduction will be far more stimulating and satisfying than the purely descriptive approach that is traditional in the biological sciences

Journal of the Physical Society of Japan ,2017 **The Mathematical Gazette** ,1917 *The 1994 IEEE International Conference on Neural Networks* ,1994 **Notices of the American Mathematical Society** American Mathematical Society,1979 Scientiae Mathematicae Japonicae ,2001 **General Systems** ,1987 **Proceedings of the 12th IAPR International Conference on Pattern Recognition: Conference B: Pattern recognition and neural networks** ,1994 **Nieuw Archief Voor Wiskunde** ,1984
