The Geese Of Beaver Bog:

The Geese of Beaver Bog Bernd Heinrich,2009-10-13 When award winning writer and biologist Bernd Heinrich became the unwitting but doting foster parent of an adorable gosling named Peep he was drawn into her world And so with a scientist s training and a nature lover s boundless enthusiasm he set out to understand the travails and triumphs of the Canada geese living in the beaver bog adjacent to his home In The Geese of Beaver Bog Heinrich takes his readers through mud icy waters and overgrown sedge hummocks to unravel the mysteries behind heated battles suspicious nest raids jealous outbursts and more With deft insight and infectious good humor he sheds light on how geese live and why they behave as they do Far from staid or predictable the lives of geese are packed with adventure and full of surprises Illustrated throughout with Heinrich s trademark sketches and featuring beautiful four color photographs The Geese of Beaver Bog is part love story part science experiment and wholly delightful

Scarlet Experiment Jeff Karnicky,2016-11-01 Scarlet Experiment explores how humanity s relationship with birds has been influenced by governmental agencies literary renderings and the conservation movement and uses six bird species to study the management of bird life in America from the nineteenth century to the present

The Nesting Season Bernd Heinrich,2010-09-15 One of the world s great naturalists and nature writers Bernd Heinrich shows us how the sensual beauty of birds can open our eyes to a hidden evolutionary process

White Feathers Bernd Heinrich,2020-02-18 The surprising rich life of tree swallows in nesting season with Heinrich s beautiful illustrations and photographs by the acclaimed naturalist Heinrich is sparked one early spring day by a question Why does a pair of swallows in a nest box close to his Maine cabin show an unvarying preference for white feathers not easily available nearby as nest lining He notices too the extreme aggressiveness of his swallows toward some other swallows of their own kind And he wonders given swallows reputation for feistiness at the extraordinary tameness and close contact he experiences with his nesting birds From the author of the beloved books Ravens in Winter and A Naturalist at Large this richly engaging view of the lives of wild birds as always with Heinrich yields marvelous mind altering insight and discoveries

When Bernd Heinrich decided to write a memoir of his ultramarathon running experience he realized that the preparation for the race was as important if not more so than the race itself. Considering the physiology and motivation of running from a scientific point of view he wondered what he could learn from other animals. In Why We Run Heinrich considers the flight endurance of birds the antelope's running prowess and limitations and the ultra endurance of camels to understand how human physiology can or cannot replicate these adaptations. With his characteristic blend of scientific inquiry and philosophical musings Heinrich offers an original and provocative work combining the rigors of science with the passion of running *History of the Expedition of Captain Lewis and Clark, 1804-5-6* Meriwether Lewis, William Clark, 1917
