The Geological Evolution Of The Eastern Mediterranean:

Geological Evolution of the Eastern Mediterranean, 1984 **The Geological Evolution of the Eastern Mediterranean** J. E. Dixon, A. H. F. Robertson, 1996 This volume includes 61 papers from a conference held in Edinburgh in September 1982 to consider all aspects of geology relevant to the tectonic evolution of the Eastern Mediterranean The book is organised in 5 sections by age of events discussed and by area within this framework The first is concerned with early Mesozoic events linked to ocean closure and so by implication deals with the fate of the Palaeozoic Tethys or Palaeotethys Later sections deal with events following the birth and growth of wholly Mesozoic ocean basins of the Neotethys *The Geological Evolution of the Eastern Mediterranean*, 1982 **Geological Evolution of the Mediterranean Basin** Daniel J. Stanley, Forese-Carlo Wezel, 2012-12-06 The Mediterranean Sea nestled between Africa southern Europe and the Middle East may be envisioned as a complex picture puzzle comprising numerous intricate pieces many of which are already in place A general image in terms of science has emerged although at this time large gaps are noted and some areas of the picture remain fuzzy and indistinct In recent years this fascinating mind teasing puzzle image has become clearer with individual pieces more easily recognized and rapidly emplaced largely by means of multidisciplinary and multinational team efforts In this respect the Special Program Panel on Marine Sciences of the NATO Scientific Affairs Division considered the merits of initiating four conferences bearing on the Mediterranean ecosystem It was suggested that the first emphasizing geology should dovetail with subsequent seminars on physical oceanography marine biology and ecology and man's influence on the natural Mediterranean regime At a conference held in Banyuls sur Mer France in August 1979 Professor Raimondo Selli was urged by some panel members to initiate an Advanced Research Institute ARI that would focus primarily on the geologically recent evolution of the Mediterranean Sea and serve as a logical base for future NATO conferences on the Mediterranean Evolution of the Levant Margin and Western Arabia Platform Since the Mesozoic Catherine Homberg, Martina Bachmann, 2010 This volume combines original data from the offshore and onshore Levant in various fields like sedimentology palaeontology geochemistry structural geology and geophysics This multidisciplinary approach provides an overview of the development of the Levant Basin and allows discussion of the later geological history and deformation processes of the Levant provinces *The Geological Evolution of the River Nile* Rushdi Said, 2012-12-06 This book gives the geological history of the river Nile since it started to excavate its course in the Egyptian plateaus in late Miocene time in response to the lowering sea level of the desiccating Mediterranean It formed a canyon longer deeper and just as awe inspiring as the Grand Canyon Arizona The canyon was transgressed by the advancing Mediterranean as it started filling during the early Pliocene and since then by a number of rivers which ebbed and flowed as they succeeded one another The modern Nile is a recent and humble successor to mighty rivers which once occupied the Nile Valley Dallas Texas Rushdi Said August 1981 Acknowledgments This book is based on field work carried out in Egypt during the seasons 1961 1978 while the

author was a member of the Combined Prehistoric Expedition sponsored by Southern Methodist University the Polish Academy of Science and the Geological Survey of Egypt Grateful acknowledgment is made to Professor Fred Wendorf leader of the Expedition and to several members for their fruitful discussions Notable among these are Claude Albritton Southern Methodist University and Dr J De Heinzelin University of Ghent Belgium The field work was aided by geologists M S Abdel Ghany and A Zaghloul of the Geological Survey of Egypt The drafting was by Reed Ellis and Hoda Samani I am also grateful to Dr M K

five papers documenting the timing and kinematics of Cretaceous arc continent collision and Eocene and Miocene continent continent collision in Anatolia with westward extrusion of Anatolia as a result Eight papers provide an overview and new data from stratigraphy structure metamorphism and magmatism covering the geological consequences of the largely Neogene collapse that characterizes the segments of interest in response to late stage reorganization of the subduction zone and the roll back and break off of segments of the subducting slab Israel Journal of Earth Sciences, 2008 **Geological Framework of the Levant** Valerii Arkad'evich Krasheninnikov, John Kendrick Hall, 2005 *Geological Evolution of the Mediterranean Basin* Daniel J.
