inspiring story by physician scientist Dr Emil Kakkis about his journey to develop a new first ever treatment for an ultra rare genetic disease called MPS The scientist had great challenges getting grant and industry support for this rare disease despite the solid science behind doing the treatment Simultaneously across the country Mark Dant was in a quest to save his 9 year old son Ryan afflicted by MPS for which there was no cure Through extraordinary persistence and with a clock ticking on

Ryan's declining health Mr Dant eventually learns of Dr Kakkis and his work whose enzyme replacement therapy could potentially treat Ryan successfully. With renewed hope of saving his son's life Mr Dant turns his attention to fundraising through his own Ryan Foundation to support the continued development of the life saving treatment. Through an extraordinary series of obstacles and heartaches Dr Kakkis develops a successful treatment and ultimately gains the required support of a biotech company to complete the project. Despite early success treating MPS patients the FDA's abruptly changing policies caused great uncertainty as to whether the therapy would ever get approved leading to a dramatic showdown at an FDA Advisory Committee meeting. In the end the treatment was finally approved for all MPS patients and ultimately saved Ryan. Ryan has been on the enzyme replacement therapy for more than 23 years. He went on to graduate college and in 2021 was married.
