

The Glaucomas

Juan Roberto Sampaolesi, Jorge Zarate

The Glaucomas:

The Glaucomas Roberto Sampaolesi, Jorge Zarate, Juan Roberto Sampaolesi, 2008-11-28 Congenital glaucoma is a complex problem which has been a frequent cause of blindness in the past. Over the past decades the prognosis of congenital glaucoma has completely changed. Surgical results are very good and enable these children to integrate entirely as adults in society. Based on the authors' accumulated experience of more than 50 years and 860 cases operated for congenital glaucoma, this well-structured and lavishly illustrated textbook atlas covers all aspects of congenital and infantile glaucoma, such as the original method for examining newborns under general anaesthesia in the slit lamp, the signs and symptoms of the disease and the differential diagnosis, the role and importance of the echometry value for early diagnosis, the gonioscopy results and the three types of congenital glaucomas: pure refractory and late, and the type of surgery to be performed in each case, with the evaluation of follow-up long-term results. Written by renowned international experts of the field, this book will become the golden standard in the field of Pediatric and Congenital Glaucomas.

The Glaucomas Roberto Sampaolesi, Juan Roberto Sampaolesi, Jorge Zárate, 2013-11-29 This second volume in a short series on the glaucomas is devoted to the two main types of the disease: open angle glaucoma and angle closure glaucoma. The contents are based on observations and experience gained during the management of more than 40 000 hospital and 7 000 private patients with follow-up of 10 to 50 years. The book is comprehensive in scope. All aspects of diagnosis are carefully examined, surgical indications and techniques are explained, and the role of medical treatment is evaluated. Importantly, chapters are included on topics that are frequently overlooked in other books but are important to early diagnosis, such as diurnal pressure curve, HRT and non-conventional perimetry. This volume provides a wealth of information and includes almost 1000 illustrations, the majority in color, as well as an accompanying DVD of surgical techniques. It will be an invaluable asset for all ophthalmologists.

The Glaucomas Tarek M. Eid, George L. Spaeth, 2000 This volume seeks to provide a thorough understanding of the basic aspects and clinical types of the glaucomas and offer detailed guidelines on patient management. The book should enable physicians to distinguish among the versatile entities and syndromes that comprise glaucoma and determine the most appropriate course of treatment for the individual patient.

The Glaucomas Robert Ritch, M. Bruce Shields, Theodore Krupin, 1989

Becker-Shaffer's Diagnosis and Therapy of the Glaucomas Robert L. Stamper, Marc F. Lieberman, Michael V. Drake, Bernard Becker, 2009-01-01 Authored by three prominent specialists in the field, this text provides comprehensive coverage of diagnostic and treatment modalities for optimal glaucoma management. Revised throughout, this new edition presents the latest guidance in clinical examination, randomized trials, medical treatment, laser therapy, and surgical procedures. Hundreds of illustrations, with many classic black and white figures from the previous editions supplemented with new color images, depict the features of glaucomas and step-by-step procedures for their management. While expanded use of highlighted boxes, lists, and summary tables make the material easy to access, evidence-based and updated information on all

aspects of the glaucomas including physiology genetics interventional trials and new surgical techniques offer a well rounded foundation of knowledge for making the most informed diagnoses and choosing the most effective course of treatment Combines the cumulative experience of three prominent glaucoma specialists addressing a full range of clinical needs for practitioners of all levels for a uniquely written coherent perspective Includes extensive references to current and historically important sources to provide comprehensive interpretation of the latest medical literature Synthesizes a classical approach to the glaucomas based on seven earlier editions spanning over 40 years with the most up to date evidence based and epidemiologically derived classifications and outcomes Coherently correlates with authoritative consensus documents on key areas of glaucoma drawn up by the world wide specialists of the World Glaucoma Association and reprinted in the text Revamps traditional teachings on the angle closure glaucomas in concert with the newest international literature and technologies to keep you up to date on the latest advances Illustrates detailed surgical interventions applicable to the complete spectrum of clinical settings from the developing world through contemporary operating rooms Examines the newest and most promising developments in pharmacology laser and surgical advances for glaucoma management to enable you to choose the most effective patient approach Illustrates invaluable but little known instruments for clinical and research diagnoses including optic nerve cupping scales bleb assessment instruments and more

Mechanisms of the Glaucomas

Joyce Tombran-Tink, Colin J. Barnstable, M. Bruce Shields, 2008-06-06 The mechanisms of the various forms of glaucoma were unknown at the outset of the twentieth century Late in the twentieth century two nascent areas of research were beginning to provide glimpses of what the twenty first century held in store for the future of glaucoma the mechanisms of glaucomatous optic neuropathy and the molecular basis of the glaucomas In Mechanisms of the Glaucomas Disease Processes and Therapeutic Modalities the authors review the most current knowledge available in the field and provide a basis in which researchers can effectively study the glaucomas The intent of the book is not primarily to describe the clinical appearances of the glaucomas nor how to manage them Rather it is to provide basic scientists who are working in the field of glaucoma with a current understanding of the clinical aspects of glaucoma and to provide clinician scientists with the basic knowledge as they attempt to translate it into rational treatments for glaucoma In this important new book leaders in the various fields of glaucoma review our current understanding of glaucoma from epidemiology and genetics through molecular cellular and tissue responses to the mechanisms of the glaucomas and the mechanisms by which we manage them Mechanisms of the Glaucomas Disease Processes and Therapeutic Modalities will be of great value as its contents will aid the reader in prevention of blindness from glaucoma
