Stellar Spectral Classification Richard O.

Gray, Christopher J. Corbally, 2021-06-08 Written by leading experts in the field Stellar Spectral Classification is the only book to comprehensively discuss both the foundations and most up to date techniques of MK and other spectral classification systems Definitive and encyclopedic the book introduces the astrophysics of spectroscopy reviews the entire field of stellar astronomy and shows how the well tested methods of spectral classification are a powerful discovery tool for graduate students and researchers working in astronomy and astrophysics The book begins with a historical survey followed by chapters discussing the entire range of stellar phenomena from brown dwarfs to supernovae The authors account for advances in the field including the addition of the L and T dwarf classes the revision of the carbon star Wolf Rayet and white dwarf classification schemes and the application of neural nets to spectral classification Copious figures illustrate the morphology of stellar spectra and the book incorporates recent discoveries from earth based and satellite data Many examples of spectra are given in the red ultraviolet and infrared regions as well as in the traditional blue violet optical region all of which are useful for researchers identifying stellar and galactic spectra This essential reference includes a glossary handy appendixes and tables an index and a Web based resource of spectra In addition to the authors the contributors are Adam J Burgasser Margaret M Hanson J Davy Kirkpatrick and Nolan R Walborn

Computational Intelligence Kurosh Madani, António Dourado Correia, Agostinho Rosa, Joaquim Filipe, 2011-04-05 The present book includes a set of selected extended papers from the first International Joint Conference on Computational Intelligence IJCCI 2009 held in Madeira Portugal from 5 to 7 October 2009 The conference was composed by three co located conferences The International Conference on Fuzzy Computation ICFC the International Conference on Evolutionary Computation ICEC and the International Conference on Neural Computation ICNC Recent progresses in scientific developments and applications in these three areas are reported in this book IJCCI received 231 submissions from 35 countries in all continents After a double blind paper review performed by the Program Committee only 21 submissions were accepted as full papers and thus selected for oral presentation leading to a full paper acceptance ratio of 9% Additional papers were accepted as short papers and posters A further selection was made after the Conference based also on the assessment of presentation quality and audience interest so that this book includes the extended and revised versions of the very best papers of IJCCI 2009 Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next editions considering not only the stringent paper acceptance ratios but also the quality of the program committee keynote lectures participation level and logistics
