Teaching History with Science Fiction Films A. Bowdoin Van Riper, 2017-02-07 Popular media has become a common means by which students understand both the present and the past. Consequently, more teachers are using various forms of popular culture as pedagogical tools in the history classroom. Science fiction is one of the most popular genres of contemporary film, a genre that permeates much of the current culture. In order to facilitate the use of science fiction films as learning tools, teachers of history need a dependable resource. *Teaching History with Science Fiction Films* is a guide for teaching U.S. and world history. In addition to covering key themes and concepts, the volume provides an era by era overview of significant issues and related films, a tutorial in using film in historical methodology, user guides for 10 key science fiction films, and sample exercises and assignments for direct classroom use. Among the films covered in this book are staples of American cultural literacy, including *Things to Come*, *The Day the Earth Stood Still*, *Soylent Green*, and *Independence Day*. Covering conceptual topics such as geopolitics, environmental consciousness, imperialism, immigration, gender roles, and technological innovation across the decades, *Teaching History with Science Fiction Films* will enable classroom teachers to effectively use movies to examine key social and cultural issues, concepts, and influences in their historical context. With a list of more than 90 recommended films, this volume will be an invaluable asset to any teacher of history.

Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-11-27
Despite the growing importance of economics in our lives, literary scholars have long been reluctant to consider economic issues as they examine key texts. This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics, with some attention to related fields such as politics and government. Its seventeen contributors include five award-winning scholars, five science fiction writers, and a widely published economist. Three topics are covered: what noted science fiction writers like Robert A. Heinlein, Frank Herbert, and Kim Stanley Robinson have had to say about our economic and political future; how the competitive and ever-changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today; and how the scholars who examine science fiction have themselves been influenced by the economics of academia. Although the essays focus primarily on American science fiction, the traditions of Russian and Chinese science fiction are also examined. A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject.

Imagining the End James Craig Holte, 2019-11-11 *Imagining the End* provides students and general readers with contextualized examples of how the apocalypse has been imagined across all mediums of American popular culture. Detailed entries analyze the development, influence and enjoyment of end times narratives. *Imagining the End* provides a contextual overview and individual description and analysis of the wide range of depictions of the end of the world that have appeared in American popular culture. American writers, filmmakers, television producers and game developers inundated the culture with hundreds of imagined apocalyptic scenarios influenced by the Biblical Book of Revelation, the advent of the end of the second millennium 2000 CE or predictions of catastrophic events such as nuclear war, climate change and the spread of AIDS. From being raptured to surviving the zombie apocalypse, readers and viewers have been left with an almost endless sequence of disasters to experience. *Imagining the End* examines this phenomenon and provides a context for understanding and perhaps appreciating the end of the world. This title is composed of alphabetized entries covering all topics related to the end times, covering popular culture mediums such as comic books, literature, films and music.
