Burgauer, 2017-01-17 Marooned in the present their only hope for the future lay in the past But first there was still the small matter of staying alive The planet they were marooned on was crawling with bird beasts immense parrotlike carnivores that stood two meters tall weighed upwards of fifty klogs and had a giant scooped beak like a pelican They normally swallowed their prey whole though not before crushing them to death in their vise like jaws Then there were the vipers writhing snake like creatures armed with dozens of sucker bearing tentacles They sprayed their victims with acid then ate them while they were still alive But it got worse Much worse Now join Andu Nehrengel and his female clone companions on an intense voyage through time First stop the Civil War and the Battle of Shiloh April 1862 one of the most horrendous land battles of all time Meet Mark Twain when he is still a riverboat pilot Journey with him north to Missouri when he joins the Confederacy Then it s back to the future and on to Mars And when you re done reading this adventure check out these other fine books by author Steven Burgauer *The Night of the Eleventh Sun* *The Road To War* *Duty Drill Courage* *Capture* and his newest historical

fiction piece Nazi Saboteurs on the Bayou with a short video trailer <https://www.youtube.com/watch?v=nQs2pwr89RI> *Out There* Michael Wall, 2025-05-01 In the vein of Randall Munroe's What If meets Brian Green's Elegant Universe a senior writer from Space.com leads readers on a wild ride of exploration into the final frontier investigating what's really out there We've all asked ourselves the question It's impossible to look up at the stars and NOT think about it Are we alone in the universe Books movies and television shows proliferate that attempt to answer this question and explore it In Out There Space.com senior writer Dr Michael Wall treats that question as merely the beginning touching off a wild ride of exploration into the final frontier He considers for instance the myriad of questions that would arise once we do discover life beyond Earth an eventuality which top NASA officials told Wall is only drawing closer What would the first aliens we meet look like Would they be little green men or mere microbes Would they be found on a planet in our own solar system or orbiting a star far far away Would they intend to harm us and if so how might they do it And might they already have visited Out There is arranged in a simple question and answer format The answers are delivered in Dr Wall's informal but informative style which mixes in a healthy dose of humor and pop culture to make big ideas easier to swallow Dr Wall covers questions far beyond alien life venturing into astronomy physics and the practical realities of what long term life might be like for we mere humans in outer space such as the idea of lunar colonies and even economic implications Dr Wall also shares the insights of some of the leading lights in space exploration today and shows how the next space age might be brighter than ever **Kliatt Young**
