## Time Travel Paradox Primer:

*Trauma in 21st-Century Time Travel Cinema* Kwasu D. Tembo, 2025-11-13 Kwasu D. Tembo unites approaches from disciplines as wide ranging as physics mathematics cinema philosophy and media theory to pose critical questions concerning time change and unbecoming in contemporary time travel cinema. In his analyses of 21st century cinematic time travel narratives Tembo situates human life in time as a palimpsest with time acting as scriptor and stylus. A time machine then functions as a fantasy that allows for this pace to be slowed or accelerated so as to appear entirely suspended with the potentials of the Now re-opened to the traveler. As the manipulation of time lends the traveler increased agency and perhaps the conditions to see themselves more clearly amid a claustrophobic sea of information and content Tembo contends that we must carefully consider the psycho-emotional affectivity of both the motivations and the potentially traumatic consequences of such a jarring shift in perspective. The results lend critical insight into human understandings of how we experience time and ultimately what these understandings permit and disallow in terms of how it is to be in time. **Impossible Puzzle**

**Films** Miklos Kiss, 2017-04-28 Narrative complexity is a trend in contemporary cinema. Since the late 1990s there has been a palpable increase in complex storytelling in movies. But how and why do complex movies create perplexity and confusion? How do we engage with these challenges? And what makes complex stories so attractive? By blending film studies, narrative theory, and cognitive sciences, Kiss and Wilemsen look into the relation between complex storytelling and the mind. Analysing the effects that different complex narratives have on viewers, the book addresses how films like *Donnie Darko*, *Mulholland Drive*, and *Primer* strategically create complexity and confusion using the specific category of the impossible puzzle film to examine movies that use baffling paradoxes, impossible loops, and unresolved ambiguities in their stories and storytelling. By looking at how these films play on our minds' blind spots, this innovative book explains their viewing effects in terms of the mental state of cognitive dissonance that they evoke. **Fantasy** Jacqueline Furby, Claire Hines, 2011-09-02 Fantasy addresses a previously neglected area within film studies. The book looks at the key aesthetics, themes, debates, and issues at work within this popular genre and examines films and franchises that illustrate these concerns. Contemporary case studies include *Alice in Wonderland* (2010), *Avatar* (2009), *The Dark Knight* (2008), *Edward Scissorhands* (1990), *Lord of the Rings* (2001–2003), *Pirates of the Caribbean* (2003–2007), *Prince of Persia: The Sands of Time* (2010), *Shrek* (2001), *Twelve Monkeys* (1995). The authors also consider fantasy film and its relationship to myth, legend, and fairy tale, examining its important role in contemporary culture. The book provides an historical overview of the genre, its influences and evolution, placing fantasy film within the socio-cultural contexts of production and consumption, and with reference to relevant theory and critical debates. This is the perfect introduction to the world of fantasy film and investigates the links between fantasy film and gender, fantasy film and race, fantasy film and psychoanalysis, fantasy film and technology, fantasy film storytelling and spectacle, fantasy film and realism, fantasy film and adaptation, and fantasy film and time.
