The Burghs and Parliament in Scotland, c. 1550-1651 Alan R. MacDonald, 2016-03-16

Existing studies of early modern Scotland tend to focus on the crown the nobility and the church Yet from the sixteenth century a unique national representative assembly of the towns the Convention of Burghs provides an insight into the activities of another key group in society Meeting at least once a year the Convention consisted of representatives from every parliamentary burgh and was responsible for apportioning taxation settling disputes between members regulating weights and measures negotiating with the crown on issues of concern to the merchant community The Convention's role in relation to parliament was particularly significant for it regulated urban representation admitted new burghs to parliament and coordinated and oversaw the conduct of the burghs estate in parliament In this the first full length study of the burghs and parliament in Scotland the influence of this institution is fully analysed over a one hundred year period Drawing extensively on local and national sources this book sheds new light upon the way in which parliament acted as a point of contact a place where legislative business was done relationships formed and status affirmed The interactions between centre and localities and between urban and rural elites are prominent themes as is Edinburgh's position as the leading burgh and the host of parliament The study builds upon existing scholarship to place Scotland within the wider British and European context and argues that the Scottish parliament was a distinctive and effective institution which was responsive to the needs of the burghs both collectively and individually

The National Covenant in Scotland, 1638-1689 Chris R. Langley, 2020 This edited collection assesses how people interacted with the National Covenant's infamously ambiguous text the political and religious changes that it provoked and the legacy that it left behind

The Spaces of Justice Peter Robson, Johnny Rodger, 2017-08-13 This book looks at the architecture of the courts in Scotland and the importance of these civic spaces Given the importance of courts to the legal experience it starts by exploring why scholars have been so reticent in examining spaces in which the administration of justice takes place It notes the major changes already unfolding in Scotland and puts these into a historical and cultural context The authors trace the emergence of the notion of the dedicated courtroom space in 19th century Scotland and the ways in which the courtroom setting affected the exercise of power through law They show what factors led to the adoption of different architectural styles They examine the changes in the legal political and social world which drove such changes and how these changed in the 20th and 21st centuries They also examine the symbolic functions of courts both internally and externally They note the changes in the decision makers and

their goals in the 21st century and how this will lead to a very different kind of courtroom in the near future They examine the wider factors affecting the process of litigation and trends in dispute resolution They conclude that the goals of transparency and civil dignity have serious implications for the kinds of spaces which will serve as halls of justice in the future Since these are driven it seems by financial imperatives it does not bode well for the retention of civic pride and community which the courts of justice might be said to embody **Scottish Life and Society: Scotland's buildings** ,2000

Martin,Charles McKean,Sue Anderson,2014 Situated in what now seems a remote corner of south west Scotland Wigtown was once an important county town With its harbour and location at the lowest fording point of the River Cree Wigtown was at one time part of a major network of land and sea routes including a pilgrim route to Whithorn The layout of the town is notable for its large market square a reflection of its importance in the cattle trade in the medieval period The town achieved burgh status in the thirteenth century by which time it was an important trading centre and the present arrangement of streets and burgh plots dates to this time Today the principal access route is from the north rather than through the East and West Ports which controlled access to the great market place The burgh arms depict a three masted sailing ship demonstrating the importance placed on its maritime trade This book examines both the town's political history as it passed between the earldoms of Wigtown and Douglas and its economic history as it competed with Whithorn before its eventual decline in the later nineteenth century The authors use the surviving buildings to examine the development of the town from the medieval to the modern period This book is part of the Scottish Burgh Survey a series funded by Historic Scotland designed to identify the archaeological potential of Scotland's historic towns **Architectural Publications Index** ,1996
