Dark Side of the Tune: Popular Music and Violence Professor Bruce Johnson, Professor Martin Cloonan, 2013-01-28 Written against the academically dominant but simplistic romanticization of popular music as a positive force this book focuses on the dark side of the subject It is a pioneering examination of the ways in which popular music has been deployed in association with violence ranging from what appears to be an incidental relationship to one in which music is explicitly applied as an instrument of violence A preliminary overview of the physiological and cognitive foundations of sounding hearing which are distinctive within the sensorium discloses in particular their potential for organic and psychic violence The study then elaborates working definitions of key terms including the vexed idea of the popular for the purposes of this investigation and provides a historical survey of examples of the nexus between music and violence from pre Biblical times to the late nineteenth century The second half of the book concentrates on the modern era marked in this case by the emergence of technologies by which music can be electronically augmented generated and disseminated beginning with the advent of sound recording from the 1870s and proceeding to audio internet and other contemporary audio technologies Johnson and Cloonan argue that these technologies have transformed the potential of music to mediate cultural confrontations from the local to the global particularly through violence The authors present a taxonomy of case histories in the connection between popular music and violence through increasingly intense forms of that relationship culminating in the topical examples of music and torture including those in Bosnia Darfur and by US forces in Iraq and Guantamo Bay This however is not simply a succession of data but an argumentative synthesis Thus the final section debates the implications of this nexus both for popular music studies itself and also in cultural policy and regulation the ethics of citizenship and arguments about human rights

Earshot Bruce Johnson, 2023-04-14 Earshot Perspectives on Sound awakens an understanding of the decisive role that sound has played in history and culture

Although beginning with reference to antiquity the primary focus is the changing status of sound and hearing in Western culture over the last six hundred years covering the transition from the medieval period to the contemporary world Since mythic times sound has been an essential element in the formation of belief systems personal and community identities and the negotiations between them The varied case studies included in the book cover major reference points in the changing politics of sound particularly in relation to the status of the other major conduit of social transactions vision Earshot is not a work of cultural theory but is anchored in social practices and material culture and is therefore a valuable resource for conveying sound to both undergraduate students as well as the general reader **Capturing Hill 70** Douglas E.

Delaney, Serge Marc Durflinger, 2016-11-07 In August 1917 the Canadian Corps captured Hill 70 a vital piece of ground just north of the French industrial town of Lens The Canadians suffered some 5 400 casualties and defeated three days of determined German counter attacks This spectacularly successful but shockingly costly battle was as innovative as Vimy yet only a handful of Canadians have heard of it or of subsequent attempts to capture Lens which resulted in nearly 3 300 more casualties In Capturing Hill 70 leading military historians mark the centenary of this triumph by dissecting different facets of the battle from planning and the conduct of operations to long term repercussions and commemoration This richly illustrated and thought provoking book reinstates Hill 70 to its rightful place among the pantheon of battles that helped forge the reputation of the famed Canadian Corps during the First World War and it sheds new light on the key role played by Lieutenant General Sir Arthur Currie who fought his first major action as commander of the Canadian Corps A History of Great Britain Howard Robinson, 1927 **Using ICT in History** David Gardner, 1998 Covering the main areas of ICT that history teachers encounter from Internet to DTP and creating and using spreadsheets this book provides a matrix for teaching opportunities at Key Stage 3 and 4 GCSE It combines practical evaluation advice and instruction and includes a large selection of activity worksheets and exemplar sheets for specific applications that teachers can adapt and use in their own teaching The Somme Robert Thomas Foley, Helen B.
